 4. *You can write only the answers. Number the answers correctly.*
-

SECTION A

1. Read the given passage and answer the questions that follow:

1x5=5

The crow is the most prominent bird in the world. Crows are found everywhere in the world except Antarctica. There are about 40 types of crows, but we are familiar with only two or three types of crows. We often see crows on top of our buildings, but they like open spaces where there are dense trees. Crows live alone but whenever one of them dies, the other crows hover around it to mourn. Dead animals are the favourite food of the crows. Crows are neither vegetarian nor non-vegetarian. That means they eat anything. The average lifespan of a crow is 14 to 15 years. A crow can lay upto 4 eggs at a time.

- a. Crows are found everywhere in the world except _____.
- b. How many types of crows are there?
- c. What do other crows do when one of them die?
